JOB DESCRIPTION

Job Title: Clinical Pharmacist
Classification: Salaried
FLSA Status: Exempt
Supervisory Role: No
Department: Pharmacy
Branch: Network
Division: Administration
Reports to: Director of Pharmacy

JOB SUMMARY:
This position is a Pharmacist, working with physicians, care managers, and other clinical staff, as part of a medical care team focusing on patient outcomes, while maintaining cost. The Clinical Pharmacist provides patients and providers with therapeutic assessments and selected disease management, for assigned practices, working toward improving patient and practice outcomes.

ESSENTIAL FUNCTIONS:
- Assist provider as needed to meet Medical Home Certification (PCMH) and meaningful use guidelines.
- Embedment in multiple practices across a 3 county catchment as part of the medical care team
- Provide clinical pharmacy input during the preparation of interdisciplinary care plans for patients
- Assist in the selection of the most cost effective, evidence-based regimen for a particular patient; monitor patients for appropriate lab and other recommended follow-up
- Serve as a drug information resource for the providers and support staff in a 3 county region
- Monitor patient response to treatment, drug/drug and drug/disease interactions, assess medications prescribed at dosages higher that approved by the FDA for specific indications
- Provide highly specialized education and training support to other professional services in the broad area of advanced pharmacotherapy, with emphasis on chronic disease states
- Utilizes existing computer resources to maximize retrieval of clinical information for monitoring and review of the medication use process, including use of the state Informatics Center and Pharmacy Home program
• Coordinate/participate in activities related to improving outcomes for targeted disease management initiatives leading to improved health (such as COPD, Asthma, CHF, and Diabetes).
• Identify patient/family gaps in knowledge of diagnosis and or treatment and development interventions with patient/family input to mitigate gaps.
• Coordinate referrals with mental health PharmD, care managers, etc. as needed.
• Make referrals to the appropriate Medicaid experts for Medicaid contractual and coverage issues.
• Manage patients with recent decrease in functional status.
• Home visits as felt needed or requested by provider.
• Priority Patient Populations: Medicaid, Dually eligible, Medicare, Uninsured, Commercial Insurance
• Review and screen patients on the TREO list (polypharmacy) provided by Community Care Plan of North Carolina to identify patients who meet the guidelines for pharmacy management.
• Coordinate and support pharmacy initiatives, such as Over the Counter (OTC) Standing Orders, Preferred Drug List (PDL), MD Easy, and electronic prescribing (e-prescribing) efforts, as outlines by the CCNC program office.
• Assists physicians in creating and managing the drug regimens of patients with chronic disease states (e.g. diabetes, asthma, CHF, ect.). This may include, but shall not be limited to, activities such as meeting with patients, adjusting medication dosages in concert with PCP, peak flow monitoring, and performing other services within the professional area of expertise
• Perform medicine reconciliation assessments as requested by Network physician and/or case managers to optimize the patient’s drug regimen
• Serve as a resource to Network physicians and case managers on general drug information and Medicaid drug policy issues.
• Serve as lead clinical pharmacist

**PHYSICAL DEMANDS:**
• Physician practice with possible exposure to infectious/contagious disease and hazardous materials.
• Environment is climate controlled with occasional exposure to inclement weather.
• Must be able to work flexible hours.
• Intensive machine concentration, such as use of computer and calculator.
• Physical demands include: frequent movement throughout the medical community, periods of standing, sitting and walking; reaching and light lifting; finger dexterity; visual and auditory acuity within normal limits.
• Travel to local and pharmacy as needed.
• Travel to home visits with patients as required.
KNOWLEDGE, SKILLS, AND OTHER REQUIREMENTS:

- Must be proficient in electronic health records and various health care such as CMIS applications
- Responsible for maintaining patient and family confidentiality in accordance with HIPPA
- Valid Driver license and motor vehicle insurance, required
- Motor Vehicle Report (MVR) status meeting current auto carrier’s insurability criteria, required.
- Ability to operate a personal computer and working knowledge of word processing, spreadsheet, and database software applications.
- Ability to work independently, exercising sound judgment, discretion and the initiative to facilitate change
- Excellent analytical and problem-solving abilities and interpersonal, written, and verbal skills.
- Excellent organizational skills, diplomacy, and professionalism.

EDUCATION AND EXPERIENCE:

- Education and formal training with Doctor of Pharmacy Degree (PharmD) from an accredited College of Pharmacy, clinical pharmacy residency or equivalent experience and licensure by North Carolina Board of Pharmacy
- Minimum 2 years as a clinical pharmacist with involvement in formulary development, drug use evaluation, and quality assurance activities. Ambulatory Care experience preferred
- Completion of a pharmacy practice or specialty residency (PGY1 or PGY2)
- Knowledge, skills, and abilities: Extensive knowledge of pharmacy and its related subdisciplines (therapeutics, pharmacology, physical pharmacy), formulary development, drug use review, quality assurance, legal, regulatory, and standards of practice
- Good written and verbal communication; the ability to integrate healthcare team
- Proficiency in using database information systems and Microsoft Office Suite
- Ability to research and analyze the medical literature including drug information, disease states, and clinical practice guidelines
